

REISSUE APPLICATION DECLARATION BY THE INVENTOR

Docket Number (Optional)
1103179-0009

As a below named inventor, I hereby declare that:

My residence, mailing address and citizenship are stated below next to my name. I believe I am the original, first and sole inventor of the subject matter which is described and claimed in patent number 6,021,265, granted February 1, 2000, and for which a reissue patent is sought on the invention entitled Interoperability with Multiple Instruction Sets the specification of which

☒ is attached hereto.

☐ was filed on _____ as reissue application number _____ / _____
and was amended on _____.

(If Applicable)

I have reviewed and understand the contents of the above identified specification, including the claims,
as amended by the amendment filed herewith.

I acknowledge the duty to disclose information which is material to patentability as defined in 37 CFR 1.56.

I hereby claim foreign priority benefits under 35 U.S.C. § 119(a)-(d) of any foreign application(s) for patent or inventor's certificate listed below and have also identified below, by checking the box, any foreign application for patent or inventor's certificate having a filing date before that of the application on which priority is claimed.

I hereby claim the benefit under 35 U.S.C. § 120 of any United States application(s) listed below:

<u>08/477,781</u>	<u>June 7, 1995</u>	<u>Patented (US 5,758,115)</u>
(Application Number)	(Filing Date)	(Status—patented, pending, abandoned)

I verily believe the original patent to be wholly or partly inoperative or invalid, for the reasons described below. (Check all boxes that apply.)

☐ by reason of a defective specification or drawing.

☒ by reason of the patentee claiming less than he had the right to claim in the patent, as described below:

☐ by reason of other errors.

My invention for a data processing apparatus for switching between multiple instruction sets, described in my patent, has numerous novel and non-obvious aspects to it. Some aspects of my invention are claimed. For example, claim 1 refers to indicator bits that are predetermined bits of a program counter register. Other novel and non-obvious aspects of my invention were unintentionally omitted from the claims without any deceptive intent on my part. For example, as the specification of the patent explains, one of the advantages of the invention is the use of a single machine word to specify both the address of an instruction and the instruction set from which the instruction comes. When a machine word is used to identify both the address of a instruction and the instruction set for the addressed instruction, a single instruction can be used to access another instruction from another instruction set. This is true regardless of whether the indicator bits are maintained as part of the program counter register or not. This aspect of my invention, along with others, have now been claimed as part of the present reissue application.

All errors corrected in this reissue application arose without any deceptive intention on the part of the applicant.
